

# Florida DOT Qualified Lambert Products List February 2008

SPEC # 925	Aqua Kure	QPL Number	
	Aqua Kure Clear DOT	Dated Material	Batch tested
	Aqua Kure White DOT	Dated Material	Batch tested

SPEC # 937	Epoxy Product	QPL Number	Type
	Epiweld 300	S937-0106	Structural Type HV

SPEC # 926	Epoxy Product	QPL Number	Type
	Epiweld 4 Cracks	S926-0406	E
	Epiweld 560 (Gel)	S926-0025	A
		S926-0121	B
	Epiweld 580	S926-0001	A
		S926-0120	B

SPEC # 934	Vibropruf Product	QPL Number	
	Vibropruf #11	S934-0004	(old# J115)

## *Epoxy Types as listed in FDOT spec Section 926*

*(From Florida DOT Specifications for Road and Bridge Construction website)*

- Type A - An epoxy resin, for bonding fresh concrete to hardened concrete.
- Type B - An epoxy resin adhesive, for bonding hardened concrete to hardened concrete.
- Type C - An epoxy resin adhesive, for bonding traffic markers to hardened concrete and to asphalt concrete.
- Type D - A coal-tar, modified epoxy resin for application as a skid-resistant or protective overlay for cement concrete.
- Type E - A fluid epoxy for crack injection in the repair of old structures.
- Type F - An epoxy for repairing spalled areas on concrete bridge structures with these subtypes:
  - F-1 - A non sagging gel type for vertical surfaces, and
  - F-2 - A pourable type for repairs where forms are to be used.
- Type G - An epoxy for rebuilding expansion joints and associated wearing surfaces.
- Type H - An epoxy for structural bonding where asphalt overlays are to be in contact with the hardened compound.
- Type I - An epoxy for filling small holes in concrete such as lifting bolt cut-outs on beams, etc.
- Type J - An epoxy for installing rebar and anchor bolts into hardened concrete.
- Type K - An epoxy for underwater sealing of the bottom of the jacket of an integral pile jacket system.
- Type L - An epoxy for coating the interior of sewage disposal tanks.
- Type M - An epoxy for coating steel H piling for fender systems (water immersion).
- Type N - An epoxy for preparing mortars and concrete for patching portland cement concrete pavement.
- Type O - An epoxy coating system consisting of a penetrant and a surface coating to be used singly or in combination for the protection of concrete surfaces, both new and repaired.
- Type P - An epoxy for bonding metals.
- Type Q - An epoxy for use in post tensioning anchorage protection systems.
